SUMMARY

I am highly skilled Fullstack Software engineer with inclination towards Backend development. I thrive on time management, prioritization, servant leadership, and details in competitive environments and excel in delivering exceptional results while re-calibrating people's perceptions to efficiently raise the bar. I am committed to the greater good of any organization for which I work and take personal responsibility for fulfilling the client's mission.

SKILLS

Programming Languages: Java, Python, Go, JavaScript, TypeScript, Scala

DevOps Technologies: AWS, Heroku, Ansible, Terraform, Docker, Kubernetes, Travis CI, GitHub Actions

Databases: Postgres, MySQL, MongoDB, CouchDB

APIs and Microservices: REST, GraphQL, Apache Kafka, Redis

Frontend Frameworks/Libraries: Angular, React

Backend Frameworks: NodeJs, Spring, Flask, gorilla/mux

EXPERIENCE

Associate Software Engineer, Turntabl Ghana Limited

Oct 2019 - Present

- Developed an API Explorer frontend app in Angular which connects over 50+ APIs and allows a user to see relationships between the APIs and connect to APIs with it data.
- Developed a cloud permission system that reduced our bills by 90% in the first 2 months, it allows developers to request a cloud resource usage for a specific duration using Google Directory, Terraform, AWS, and GCP.
- Developed an API strategy of using OpenAPI specification to document APIs connections and relationships that is used on over 50+ APIs for the API Explorer.

Software Developer, Association of African Universities

Jun 2019 - Aug 2019

- Develop a robust multi-lingual research system to house research bank data for Researchers from over 360+ universities across Africa.
- Worked with other developers to maintain the association's website.
- Implemented an ETL process to migrate legacy data (.xls) to SQL database.

Software Developer, Fady Technologies

May 2016 - Aug 2016

- Developed a Python-based financial invoicing application that reduced total time spent on invoicing by 35%.
- Worked alongside another developer to implement a RESTful API in Flask that enable our client's internal analytic team to increase reporting speed by 24%.
- Developed and maintained over 10+ websites using HTML, CSS, JavaScript, jQuery and WordPress.

PROJECTS

Automatic Employee Contract Generating System

- Worked with an NGO, Global Brigades Organization based in Cape Coast, Ghana to automate the letter generation and task assign letters to their well over 800 volunteers from all over the world each year.
- Implemented a system that saved the NGO lot in time, money and from error in the manual generation.

Student Grading and Academic Development System

- Worked with the College of Holy Quran and Islamic Studies based in Accra, Ghana to develop a system to grade and allocate scholarships to students.
- Develop a system that was simple for all the lecturers to use easily.

Open Source: ts-express-cli

- Started and still maintains ts-express-cli; A simple cli tool to generate a minimal NodeJs express server with TypeScript. See more: <https://www.npmjs.com/package/ts-express-cli>

Open Source: hql-tag

- Contributes to hql-tag; is a Hasura specific wrapper over graphql-tag. See more: <https://www.npmjs.com/package/hql-tag>

EDUCATION

B.Sc. Computer Science, Computer Science

Aug 2015 - May 2019

University of Cape Coast
